

Tony Heagerty obtained his medical degree in London and his MD in Leicester. He won the International Society of Hypertension Outstanding Young Investigator Award in 1988 and delivered the Royal College of Physicians' Goulstonian Lecture in 1990. He is a former President of the European Society of Hypertension and Member of Council of the Royal College of Physicians and a serving Member of the British Heart Foundation. He was most recently appointed President of the International Society of Hypertension (2008-2010). In 2006 he received from the European Society of Hypertension the Folkow Award for his studies of the physiology of the circulation in hypertension and in 2007 was Lecturer of the Year and toured Hypertension Centres in Belgium. His clinical interests are in high blood pressure and cardiovascular diseases. He is a Founding Member of the Academy of Medical Sciences. He originally described the concept of structural alterations in the circulation associated with high blood pressure and is currently Head of the Cardiovascular Research Group in Manchester. He is an international authority on high blood pressure, aetiology and management. He holds an Honorary Consultant contract with Manchester Royal Infirmary and holds regular clinics for the treatment of high blood pressure as well as General Medicine. He is a member of the Institute of Health Sciences Diabetes and Obesity Research Network.
